Smart Motion Sensor
CP-HAS-M99-W

CP PLUS

Detection Angle 90°

Can effectively detect motion within a 90-degree field of view, typically represented as a quarter-circle, spanning from the sensor's position.

Detecting Distance Max. 9m under 25°C

Can effectively sense motion from objects or individuals within range. In colder or hotter environments, the detection range may be slightly different due to changes in the sensor's sensitivity.

CP PLUS

Wi-Fi Support

Powered by the Internet-of-Things, this motion sensor connects with your home Wi-Fi and enables you to gain complete control over your home using your smartphone.

2.4GHz Wi-Fi Range

Developed with an amplified Wi-Fi range so that you can give every part of the house the same attention when it comes to installing safety protocols.

Easy to Use

Quite convenient to operate and utilize, this motion sensor is the most user-friendly device in the industry for ensuring protection against intruders.

Specification - CP-HAS-M99-W

Feature	Specification
Detection Distance	Max. 9m under 25°C (detecting distance will be different, depending on environment temperature)
Wi-Fi Networking	Supported (2.4GHz)
Network	IEEE 802.11 b/g/n
Detection Angle	90°
Working Voltage	DC 3V
Pet Protection Level	11kg or less
Led Indicator	Supported
Networking Button	Supported
Anti Tamper Button	Supported
Working Temperature	-10 ~+50°C
Working Humidity	≤95%(no condensation)
Dimension	Φ80mm x H28.5mm

Applications

Office

Home

Restaurant

School

Hospitality
