MISSIONTECH2.0 LEVEL - II

The security & surveillance industry is on an upswing with a burgeoning need for trained and qualified System Integrators, who can design and customize solutions as per the customer's needs, providing efficiency and effectiveness. The pace of the industry is such that it requires system integrators to be consistently updated and informed about the latest technological advancements, and their skills enhanced to work with the latest state-of-the-art products and solutions. CP PLUS Certificate Training Programs are a step in that direction with an effort to keep our channel partners trained and our services relevant.

GOAL

CP PLUS Training Programs have been designed:

- To impart globally relevant, premium - class IP Video Surveillance Training, to the System Integrators and partners.
- To up-skill and upgrade System Integrators for effective and efficient CCTV solution designing & execution.
- To enable System Integrators to deliver customized, robust and scalable solutions across different verticals.
- To deliver value, by implementing the most relevant surveillance solutions and thereby ensuring good ROI in CCTV business.

OBJECTIVE

- CP PLUS Certification Program aims to train and educate Surveillance System Engineers to **Install, Operate and Maintain CP PLUS Products, as well as Design Intelligent Security Solutions** and provide a lifetime sustenance for total customer satisfaction.

LEVELS OF LEARNING & CERTIFICATION

Level 1 :

CP PLUS Certified Surveillance Engineer (CP PLUS CSE)

- 4 Days Program

Level 2 :

CP PLUS Certified Surveillance Professional (CP PLUS CSP)

- 3 Days Program

Level 3 :

CP PLUS Certified System Designer (CP PLUS CSD)

- 2 Days Program

CERTIFICATION LEVELS

Level – 1 (CP PLUS CSE)

CP PLUS Certified Surveillance Engineer (CP PLUS CSE) Level – I program provides basic training on Installation, Operation & Maintenance of CP PLUS security products. It is designed for technical engineers and those who have at least **6 months of industry experience** and have passed Class 12 **with a major in Science** and have already gained some basic security system knowledge.

Level – 2 (CP PLUS CSP)

CP PLUS Certified Surveillance Professional (CP PLUS CSP) Level – II has been designed for on-the-job System Engineers working for a SI or installers. This certification provides advanced technical operation on CP PLUS Security Products and technical knowledge of **Integrated Security System Designing** for small and medium size Projects. System Engineers with at **least 2 years with hands on experience** can take this Program. The trainee must also be pre-qualified on Mission Tech Level-I CP PLUS CSE Certifications or **should have executed minimum two CCTV projects valued at INR 10 Lacs plus each in last the 2 years.**

Level – 3 (CP PLUS CSD)

CP PLUS Certified System Designer (CP PLUS CSD) Level – III has been designed for focused participants interested in **Advanced designing of CP PLUS Vertical Specific Solutions** using state-of-the-art contemporary and niche surveillance technologies. Developed for electronic security **industry experts**, this certification provides a complete understanding on the designing and implementation of vertical solutions. Participants willing to undertake this certification must have qualified LI & L2 Level of CP PLUS Certifications or should be working as Surveillance System Designers and **should have executed minimum two Surveillance Projects valued at INR 30 Lacs plus each in last 2 years.**

CP PLUS MISSION TECH CERTIFICATE PROGRAMME: LEVEL-II

CP Plus Certified Surveillance Professionals (CP Plus CSP - Level II)

CP PLUS Certified Surveillance Professionals (CP PLUS CSP) Level II Certification provides a detailed understanding of Video Surveillance System Designing commencing with Designing & Engineering to Implementation & Sustenance through its life cycle. The scope of the program includes System Design, Execution & Project Closure, spread across all Verticals of IP Solutions with Integrated VMS Platform. It is a 3 Days Paid Program designed for CCTV Professionals who wish to Up-Skill and Upgrade their business to the next level of CCTV System Solutions, with state-of-the-art CP PLUS CCTV Technology powered by Artificial Intelligence (AI). The Program is open to all individuals in the business of Video Surveillance Industry for at least 2 years, and have executed at least two CCTV System Installation Projects valued at Rs 10 Lacs or above each and have preferably qualified on CP PLUS Mission Tech Level -I Program.

Programme Architecture:

- Fundamentals of Video Surveillance System Designing.
- Project Bidding & Technical Evaluation of Projects.
- Solution Designing, Engineering & Execution.
- Integrated VMS Platform.
- Peculiarities of Surveillance Solution Verticals.
- Tech Specifications of CP PLUS Project Series & Advantages.
- Live Demo & Display of Project Series Products.

Take Aways for Trainees:

- Opportunity to be CP PLUS Certified System Integrator, post successful participation.
- Training with the best in Industry; affiliated with Electronic Sector Skill Council of India (ESSCI)/ NSDC.
- Training by India's Largest OEM in the CCTV Industry.
- Joint Certification by CP PLUS & Electronics Sector Skill Council of India ESSCI/NSDC, post Assessment & Successful qualification by ESSCI.

Program Conduct Methodology:

- Classroom Training by Experts from India's largest OEM.
- Executed Case studies by actual stake holders.
- Live display of products range with technical specifications.
- Live Demo of Project Series Product Range.
- Optimum Training & Reference Material.
- Medium of Instructions – Hindi/ English & regional Language, wherever possible.

Program Overview

Integrated Security System & Designing Certification Training

The objective of the certification program is to equip participants with the necessary skills to design and establish Complete CCTV Surveillance Systems. This program will provide in-depth understanding of surveillance and networking system fundamentals. It will also dive deeper into the Integrated VMS platform, offering insights into supporting equipment such as Storage Boxes, Video Walls, Internetworking Devices, and Control Systems. The certification will include practical hands-on experience with both software and hardware devices.

1. Fundamentals and Introduction to Surveillance Systems
2. Essential Concepts of Networking
3. Key Terminology and Conceptual Understanding
4. Surveillance System Planning & Designing
5. Bandwidth, Throughput, and Aggregation in Surveillance Systems
6. Calculating Storage Requirements for Data Center
7. Advance products & Features for Safety & Security of Facility
8. Designing of Command-and-Control Room
9. Other Product Range
10. Verticals & Solutions, Vertical Peculiarities & Solutions.
11. Project Management, Closing & Handing over
12. Case Studies of executed projects by stake holders
13. Live interactions with Project Managers
14. Onsite Assessment & Feedback

Who Should Attend

- Individuals already in business of CCTV Industry with minimum experience of 2 Years.
- Individuals wishing to Up-Skill and Upgrade to Surveillance Project Development.
- For Staff & Workforce of Project Managers of CCTV System Designers.
- Safety & Security Managers of various Facilities/ Sites.
- Corporate administrators, responsible for Safety & Security of facilities & corporates.
- Security professionals engaged in monitoring & handling of Electronic Security Systems.

Basic Requirements for Participants

- Should be in business of CCTV Industry or Security Management.
- Adequate basic knowledge of CCTV Products.
- Minimum Science Graduate or 2 years' experience in business of CCTV.
- Preferably qualified on CP PLUS MissionTech Level 1 Program.

Program Duration :

03 Working Days; Boarding & Lodging to be arranged by Participants themselves.

Programme Fee :

INR 12900.00 plus 18% GST (including Assessment & Certification by ESSCI).

Special Discount :

20% Discount on participation of 3 or more candidates from One Company/Organisation.
