System Overview

Concerned due to the rise in crime against kids in our society in recent years, CP PLUS took an initiative to help the matter. As a result, the stylish and unique range of Kids' smartwatches, famous as EzyTrack, have flooded the market. The EzyTrack smartwatches allow individuals to effortlessly track, monitor, and connect with their children at any time no matter where they may be.

Functions

Touch Screen

EzyTrack's touchscreen interface enables your kids to perform actions through tapping/swiping on the screen. This user-friendly digital watch provides several other features ideal for daily use.

CP-TL3 Smart Watch (Blue)

Functions

GPS Tracking

There is an in-built GPS smart locator that allows you to conveniently track your child's location anytime and anywhere.

Pedometer

Enables you to accurately track kid's movement with a pedometer that counts their number of steps.

SOS

SOS messages can be sent in the case of an emergency. Press the SOS button for three seconds to send an SOS message. Parents will be notified about their child's position, once the SOS alarm is activated.

Two-way Communication

With this important feature you can call on the watch and talk directly and the child can also instantly call his/her parent from the watch itself, which helps in connecting with parents immediately.

Voice Chat

Parents and children can send Voice messages using this feature and can remain in touch throughout the day.

Protection from Stanger

Unknown numbers cannot call on the watch except the parents. This feature will restrict all the other contact numbers to call on the watch that are not added to the family list or those people who are calling directly on the watch number.

Class Mode

Kids cannot use the watch during this time period, however, if a parent wants to call then it will be auto answered and the parent can still hear what is happening.

Listening Feature

Watch will call back automatically to the parent contact number immediately without manual intervention on the watch by the child.

About CP PLUS

The brand that is on its way to lead the world when it comes to the security and surveillance industry, CP PLUS, keeps bombarding the market with the most reliable range of products that have been designed carefully and methodically to automate the whole surveillance and security process, no matter how big your premises are.

It was the initiative to help the public in the area where they are the most vulnerable and to empower the sense of safety in our hearts that had conceptualized CP PLUS. And embarking on its mission to make the world a safer and more secure place has taken the brand's journey to unprecedented levels even when compared to international competitors.
