 works with Google Home

4MP Quad HD Camera

Designed to represent an enhanced picture quality in full HD video so that every detail can be viewed with vivid clarity and a pixilated video feed can be avoided.

Easy to Install

This EzyKam+ by CP PLUS does not even require installation hassles and you can easily place it on a mount, plug it in, connect to the Wi-Fi and you are good to go.

Motion Detection Alerts

This camera detects movements in the video frame and send alerts in real-time to always keep you notified about what's happening at home.

Human Body Detection

Designed to provide human detection and intelligent alerts, which means only being alerted only when the need occurs as the camera detects people as opposed to animals, passing vehicles, or other inanimate moving objects.

Privacy Mode On

Privacy Mode Off

Privacy Mode

Using privacy mode, you can block the camera view & recording of a specific area of your choice to maintain privacy.

Superior Night Vision

Provides full-color video even in low light. Using a bigger CMOS image sensor, this camera offers a wider contrast range allowing shadows and darker areas to be illuminated with perfect clarity as the sensor with bigger pixels collects more light, and more light improves the image quality even in the dark.

View & Talk

Enables you to stay in touch with your loved ones from anywhere, meaning you can also talk while viewing the live video feed on the phone.

Alexa and Google Supported

Works with Alexa & Google Home so you can go hands-free and command the camera with your voice while enjoying the safety of a smart home.

“Alexa, show me kid’s room camera.”

“showing the kid’s room view.”

Specification - V47A

Feature	Specifications
Image Sensor	4MP CMOS sensor
Compression	H.265
Resolution	4MP
Minimum Illumination	0.01Lux
Night Vision	Full Color (Spotlight ON)
