HypaShield 6 Layers Anti - Bacterial Mask

- Bacteria Filtration Efficiency > 99.17 for small particles (3 micron).
- 6 Layers protection including double Meltblown filtering layers.
- Ear-loops or headband variants available.
- In-built nose pin for close fit.
- Three dimensional modelling.
- High quality Particle Protection Cotton (PPC).
- Middle half fold design.
- Ultrasonic stitching for strength.
- 3D breathing space.
- Premium international packaging.
- Seal of Trust on each box.
- CE, FDA, N95 FFP2, ISO 9001:2015, ISO 13485:2016, ISO 22609:2004, GMP, EN 149:2001 + A1:2009 Certified.

About CP-MED

CP PLUS, India's leading brand in everything that is to do with security & surveillance, has announced the launch of CP-MED. Quite a large range of products introduced under the CP-MED initiative have been made available in the market to reliably combat the COVID-19 menace. These COVID-19 specific products vary from an IR Thermometer to 3D Anti-Bacterial KN95 and N95 Masks as well as Oximeters. All of these products have acquired all the national and international quality Certifications. CP-MED products are being manufactured with the sole purpose of providing care to the public at a price that everyone can afford under the banner of the brand's baseline, 'Caring for You'. This led to the creation of yet another marvelous product in the shape of the Ultraviolet Sanitizing Kit.

Through the CP-MED initiative, CP PLUS is able to plug in the huge demand and supply gap in the country, during

the COVID-19 crisis. The brand is widely known across the world for ensuring a marvelous quality is made available in the market at friendly prices, especially during trying times. In the upcoming months, there will be a host of products launched by CP PLUS, targeted at different market segments under the CP-MED umbrella, to cater and assist the constantly revising marketplace conditions.

The products under CP-MED are manufactured under the quality control of the CP PLUS R&D team, at different Manufacturing units. These products have been designed and specifically for guaranteeing superior features and unparalleled protection, which makes them suitable for use in every industry as they can be greatly beneficial not just in Hospitals, but in all offices, factories, and institutions as well.
